

Digitized Automation for a Changing World

# Delta Compact Modular Mid-range PLC AS Series

[www.deltaww.com](http://www.deltaww.com)

# Flexible, Smart, Friendly - The Best Choice for a Controller of Automated Equipment

## AS Series

The AS Series Compact Modular Mid-range PLC is a high performance multi-purpose controller designed for all kinds of automated equipment. It features Delta's self-developed 32-bit SoC CPUs for enhanced execution speed (40k steps/ms) and supports up to 32 extension modules or up to 1,024 inputs/outputs. The AS series provides accurate positioning control for up to 8 axes via CANopen motion network and 6 axes via pulse control (200kHz). It is widely used in diverse automated equipment such as for electronics manufacturing, labeling, food packaging, and textile machines.

The AS Series Controller is equipped with CANopen and EtherNet/IP network communication for high-speed data transmission. The professional yet simple editing software ISPSoft delivers quick hardware and network configuration with built-in function blocks for different industries. It also provides multi-layer password protection for enhanced system security.

The AS Series adopts a rackless design and DIN rail clips for fast vertical module installation. The simple shape and dark gray exterior of the AS series help resist stains and dirt in harsh industrial environments.

## High Efficiency Computing

- Advanced CPU performance
- Optimized execution efficiency
- Optimized I/O update rate
- Permanent data backup, no battery required

## Accurate Axis Control

- Delta CANopen positioning control
- Simple control instructions
- High-speed pulse positioning control
- High-speed counter

## AS500 Motion Control Solution

- AS500 EtherCAT motion control system
- AS500 CANopen motion control system
- Higher scalability in DVP-MC & AS500
- Highly integrated CPU design

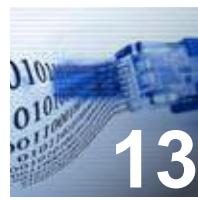

## AX-3 CODESYS Control Solution

- AX-3 CODESYS control system
- Benefits of CoDeSys platform
- Highly integrated CPU design

## Simple Installation

- Easy installation process
- Convenient grounding protection
- Screwless installation procedure
- Loose-proof clip-type terminal block

## Industrial Network Solution

- EtherNet/IP solution
- Remote I/O solution
- Serial communication solution

## Programming & Diagnosis

- Modular programming structure
- Convenient editing environment
- Easy hardware configuration and parameter setting
- Complete setting tools
- Multiple password protection

## Models and Specifications

- Model name explanation
- CPU
- AS Series I/O modules
- High-density modules and accessories
- Dimensions
- Ordering information

# High Efficiency Computing

Delta's self-developed AS200/AS300 Series CPU provides 32-bit high-performance computing and a real-time operation system. As the core of a high-efficiency controller, it helps increase the productivity and adaptability of demanding equipment.

## Advanced CPU Performance

### ▪ High execution speed

- Max. number of inputs/outputs: 1,024
- Max. extension ability: 32 modules

LD instruction of  
AS200/300 series CPU      25 ns

LD instruction of  
AS500 series CPU      50 ns

LD instruction of  
AX-3 series CPU      5 ns

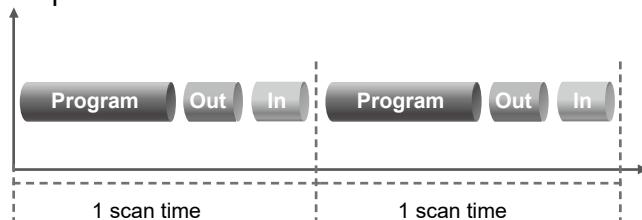

# Optimized Execution Efficiency

## ■ General Scanning Method

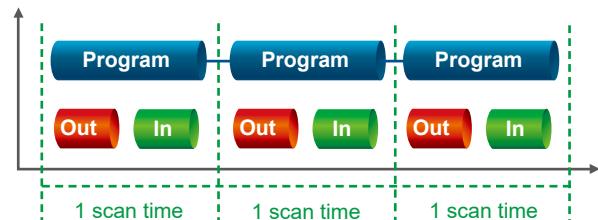

Standard simplex scanning which sequentially goes through instructions by fixed schedule operation (e.g. I/O update).

It significantly affects overall execution speed.

## ■ AS Series Scanning Method

Fixed schedule operations will be automatically processed by the CPU background program when scanning starts. This significantly enhances execution speed.

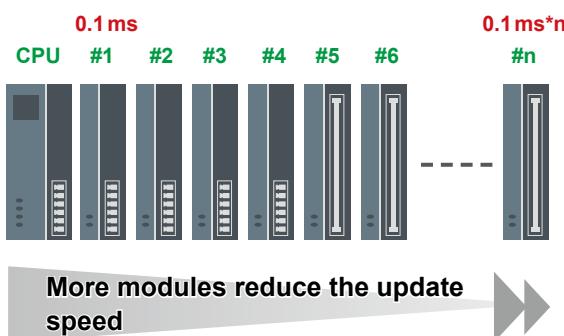

# Optimized I/O updates

## ■ Common in the industry:

PLC module bus update via serial communication

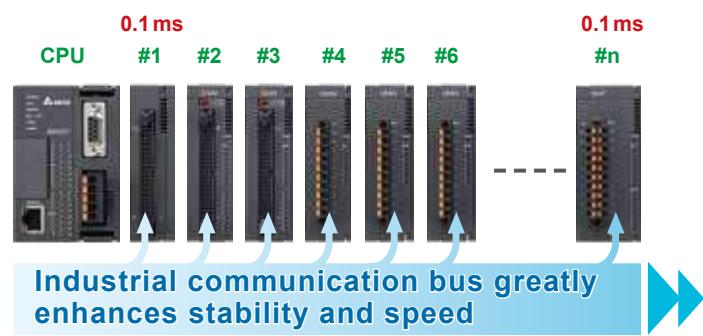

- General serial communication: the signal is sequentially sent from the 1<sup>st</sup> module to the last module. The more modules the longer I/O update time it takes.

## ■ AS Series:

PLC module bus update via optimized CAN protocol

- CAN protocol: The signal is sent via optimized CAN bus protocol. The I/O update time is not significantly prolonged even with more modules.

Note: The real updating performance will be different for different extension modules.

# Permanent data backup, no battery required

## ■ Non-volatile memory material for data backup

	PLC power off
PLC programs	permanent backup
Latched area	permanent backup

## ■ Lithium button battery for Real Time Clock (RTC) function

	PLC power off
RTC	keeps accurate time

# Accurate Axis Control - Positioning Control Solution

## ■ AS200/300 positioning control - Delta's CANopen control

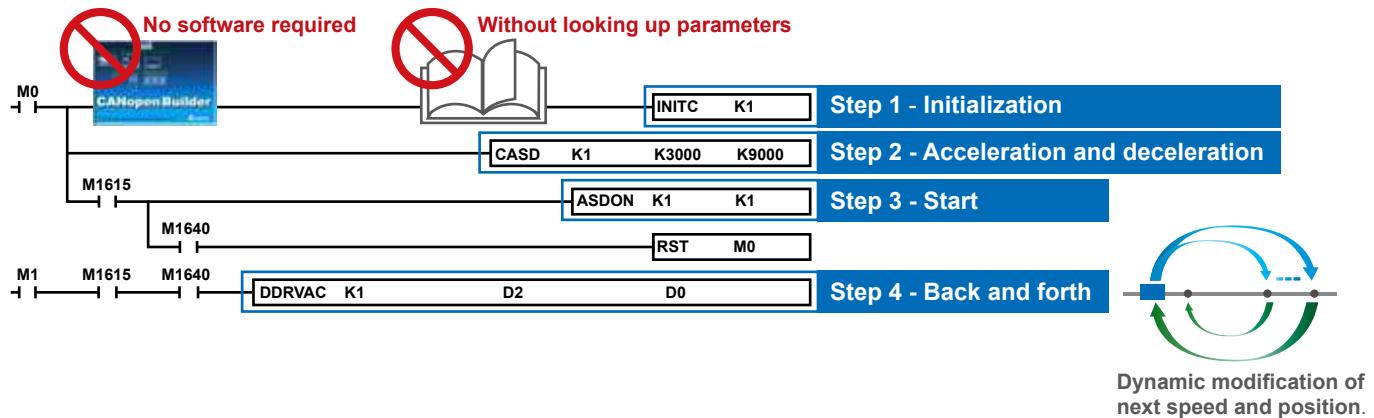

- AS200/300 supports up to 8 Delta servo drives and 8 AC motor drives (AS-FCOPM function card is needed for the AS300)
- Fast positioning configuration in one initialization instruction without building CANopen data exchange table
- Axis control by instructions provides easy maintenance and high PLC program readability

## ■ Simple control instructions for Delta drives (AS200/300 series CPU only)

- |  |  |
|--|--|
| ▪ Initialization: INITC                    | ▪ Constant speed control: PLSVC            |
| ▪ Relative positioning: DRVIC (Servo only) | ▪ Absolute positioning: DRVAC (Servo only) |
| ▪ Read and write parameter: COPRW          | ▪ Start/Stop: ASDON                        |
| ▪ Acceleration and deceleration: CASD      | ▪ Homing: ZRNC (Servo only)                |

### ASDA-A2 back and forth motion control in 4 steps

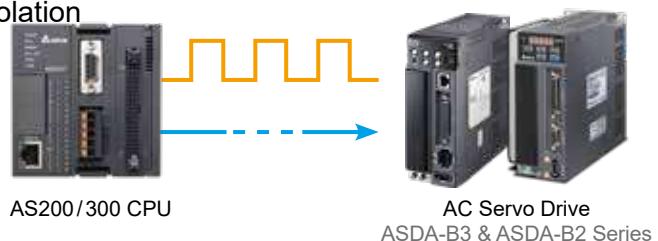

## ■ Positioning control - high-speed pulse

- AS332T-A/AS332P-A transistor CPU: 6 axes (or 12 channels) 200 kHz
- AS324MT-A differential CPU: 2 axes 4 MHz + 4 axes 200 kHz
- Supports positioning planning table for fast positioning planning and path simulation (AS200/300 series CPU only)
- Choose any given 2 axes for linear and arc interpolation

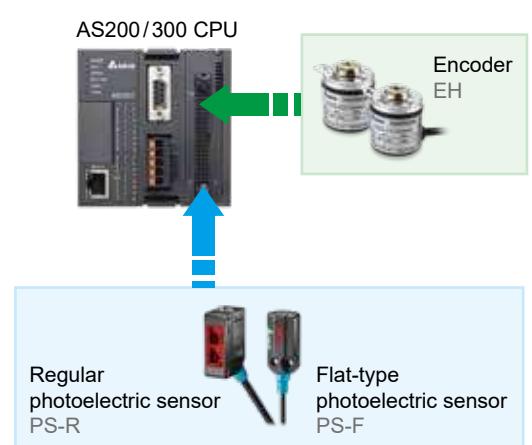

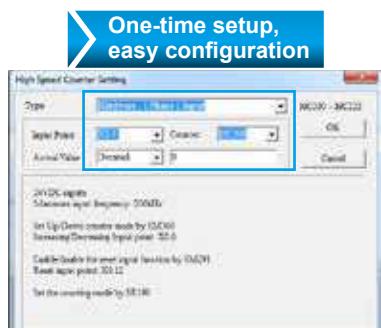

\* Note: Please refer to the product specification section (P.28) for more information on CPU models

## ■ High-speed counter

- Real-time high precision monitoring:  
AS332T-A/AS332P-A transistor CPU: 6 channels 200 kHz  
AS324MT-A differential CPU: 2 channels 4 MHz/4 channels 200 kHz
- Up to 16 external input interrupts
- High-speed counter setting tools

\* Note: Please refer to the product specification section (P.28) for more information on CPU models

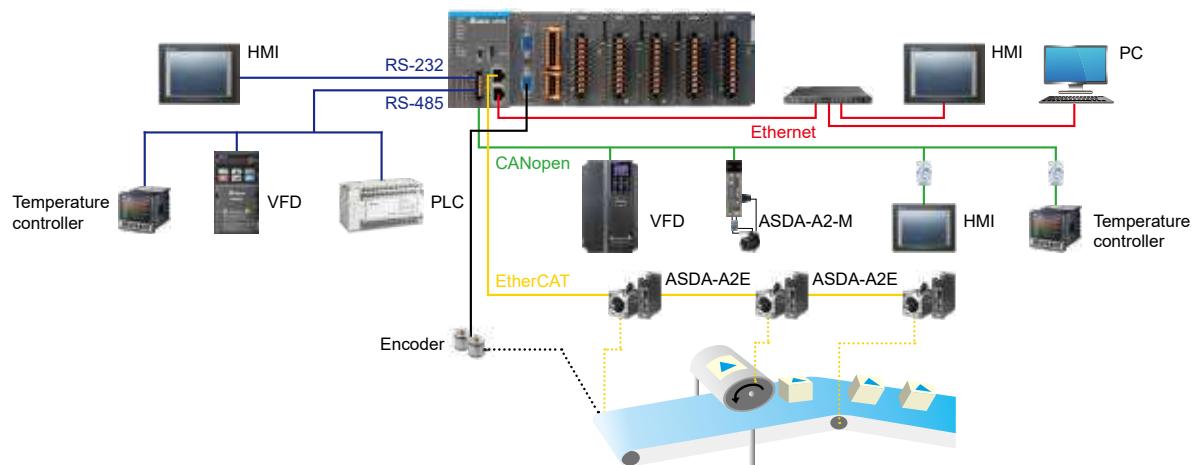

# AS500 Motion Control Solution

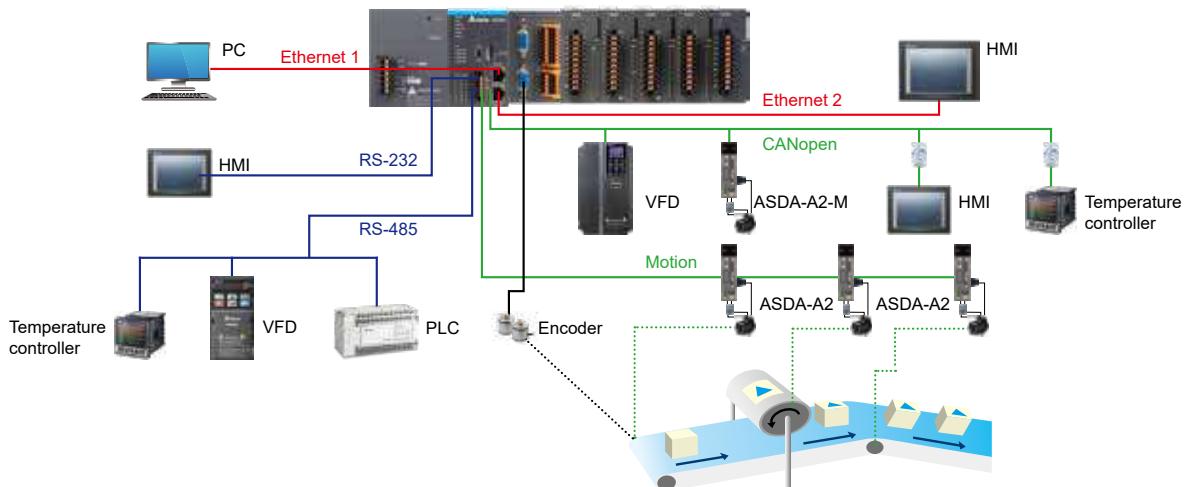

## ■ AS500 EtherCAT motion control system

- AS516E CPU supports up to 16 Delta EtherCAT servos (min. sync time: 1 ms / 16 axes)
- AS532ES/AS564ES CPUs support up to 32/64 Delta EtherCAT servos (Point-to-Point mode)
- Supports AS power, DIO, AIO, temperature and load cell expansion modules (max. 32 modules)
- 1 GHz processor provides high operation performance
- Provides various motion commands: position, velocity, torque, multi-axis interpolation, E-gear, E-CAM, G-code, and more
- Built-in 16 DI & 8 DO, 2 incremental encoders, SSI absolute encoder, RS-232/485, Ethernet, CANopen DS301 and EtherCAT interfaces

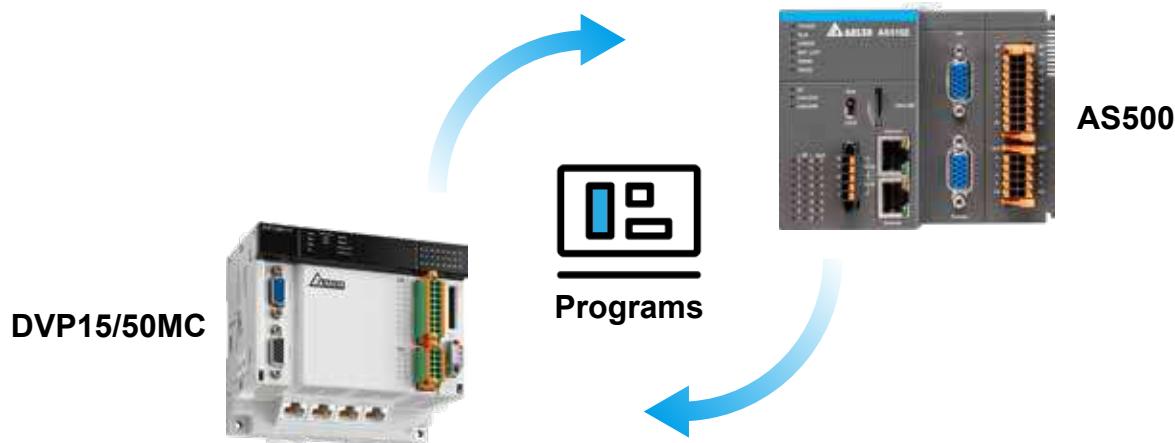

## ■ AS500 CANopen motion control system

- AS524C CPU supports up to 24 axes Delta CANopen servos (min. sync time: 2 ms / 4 axes)
- Supports AS power, DIO, AIO, temperature and load cell expansion modules (max. 32 modules)
- 1 GHz processor provides high operation performance
- Provides various motion commands: position, velocity, torque, multi-axis interpolation, E-gear, E-CAM, G-code, and more
- Built-in 16 DI & 8 DO, 2 incremental encoders, SSI absolute encoder, RS-232/485, Ethernet (x2), CANopen DS301 and CANopen motion interfaces

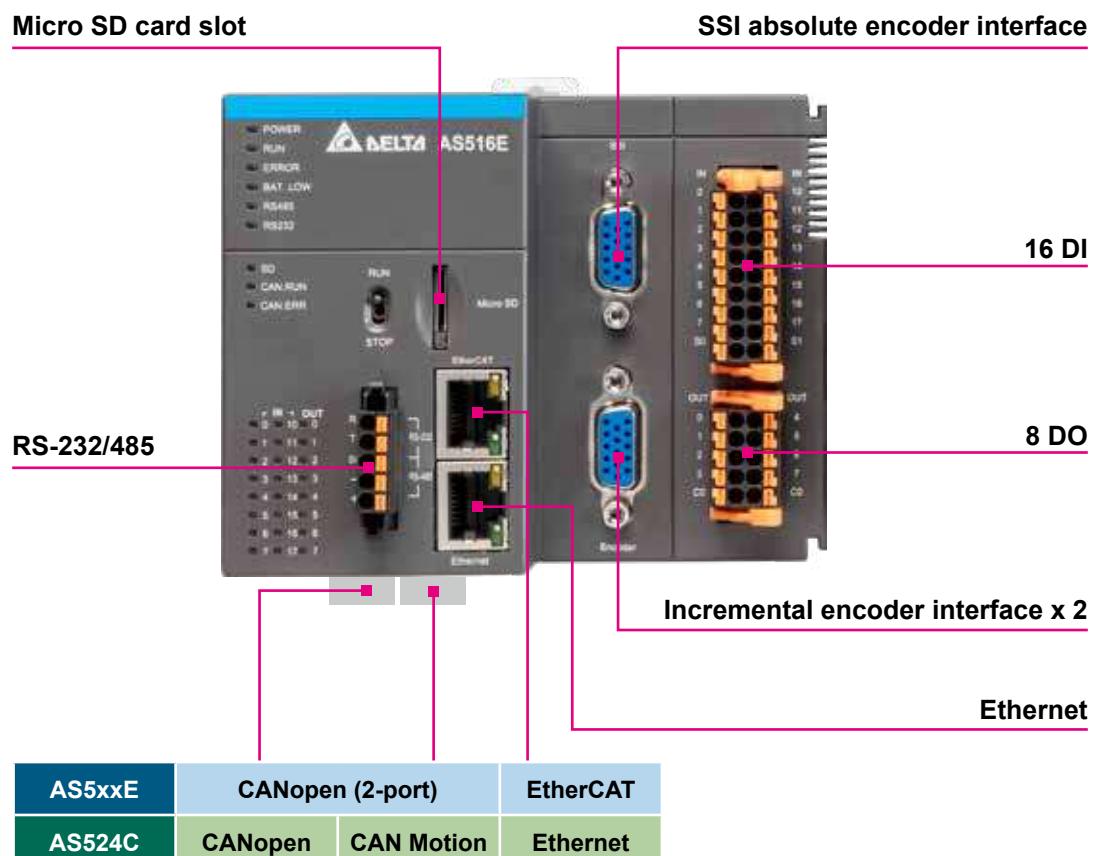

## ▪ Higher scalability in DVP-MC and AS500

AS500 motion CPUs are designed with the Delta DVP-MC motion platform, which allows users to scale up/down their systems to AS/DVP systems without rewriting all programs

## ▪ Highly integrated CPU design

The AS500 motion control CPUs feature various built-in I/O and communication protocols to satisfy customer needs for compact design and high performance

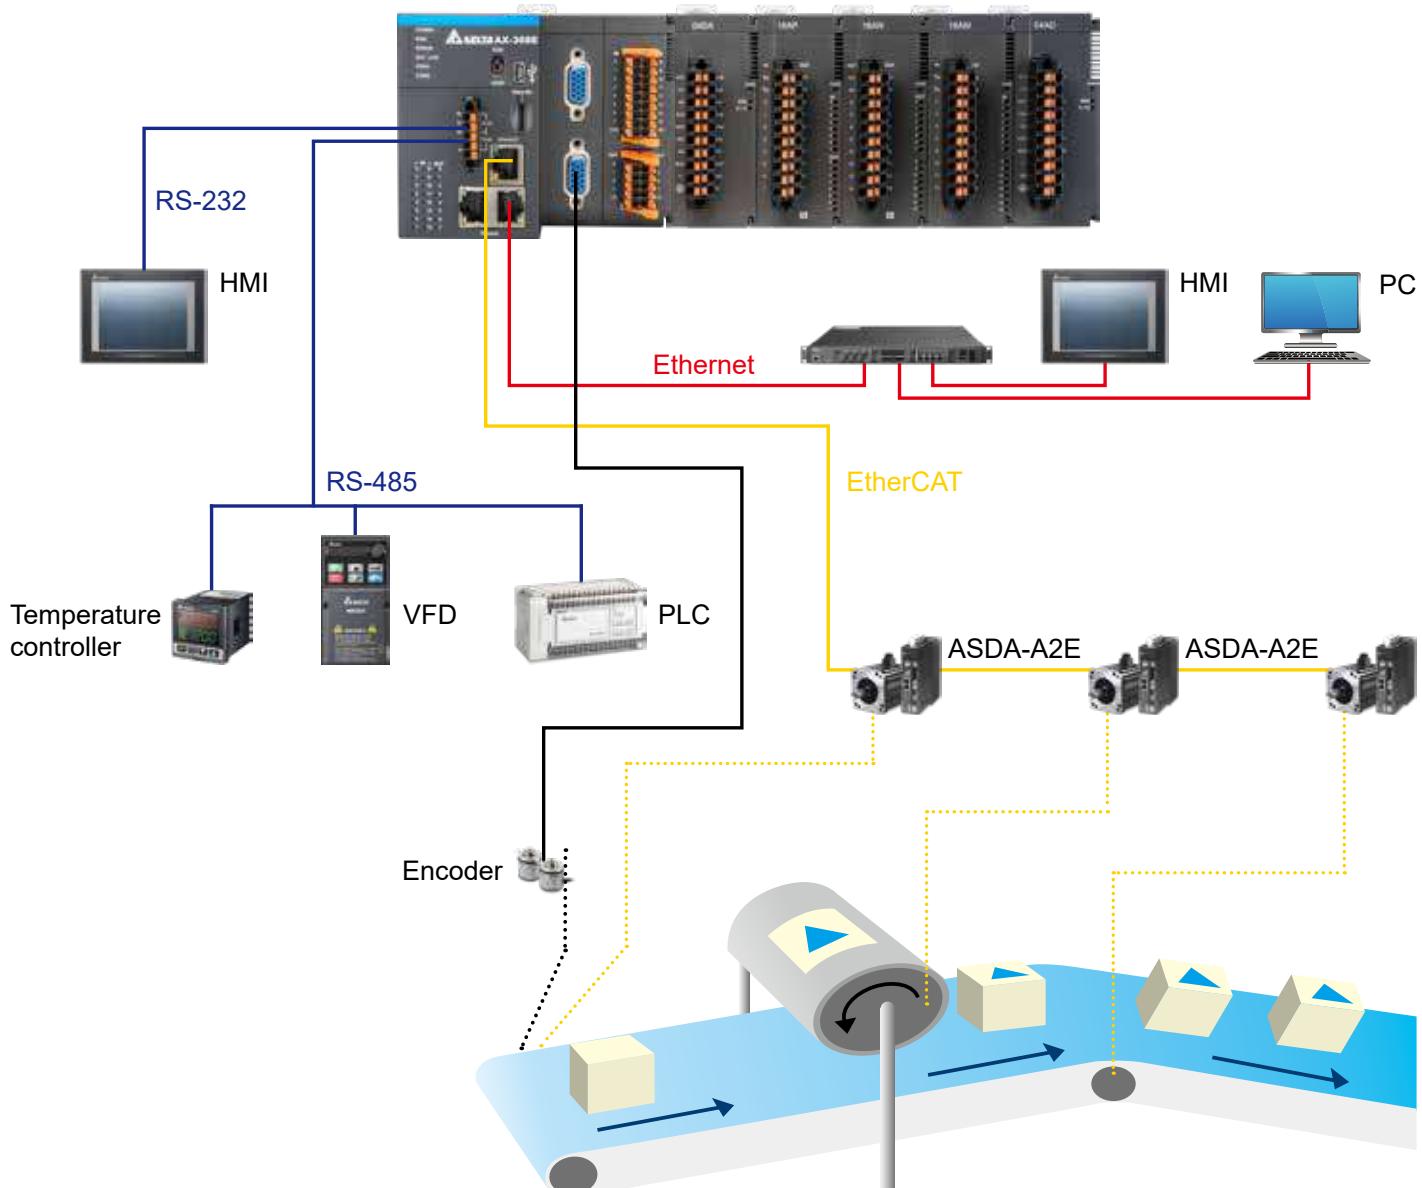

# AX-3 CODESYS Control Solution

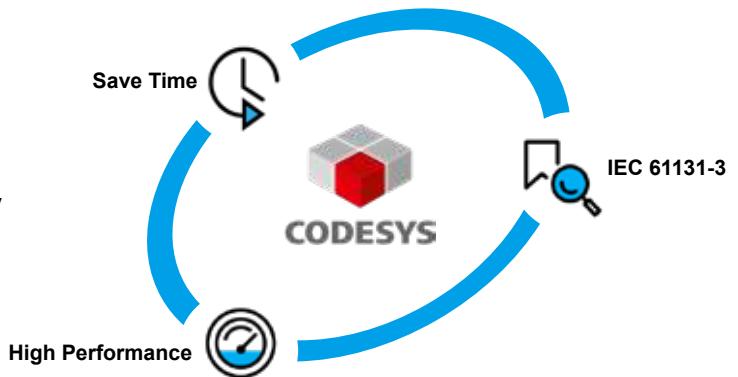

## ■ AX-3 CODESYS Control System

- Provides multiple controller solutions
  - EtherCAT motion controllers
    - AX-308E CPU supports up to 8 EtherCAT axes (min. sync time: 2ms/8 axes)
    - AX-304EL/AX-364EL CPUs support up to 4/64 EtherCAT axes (Point-to-Point mode)
  - Logical controllers
    - AX-300N/AX-324N CPUs built-in 0/24 DIO points
- Supports AS power, DIO, AIO and temperature expansion modules (max. 32 modules)
- High performance, min. command execution time: 5 ns
- Provides various motion commands: position, velocity, torque, multi-axis interpolation, E-gear, E-CAM, and more
- Built-in 16 DI & 8 DO, 2 incremental encoders, SSI absolute encoder, RS-232/485, Ethernet and EtherCAT interfaces

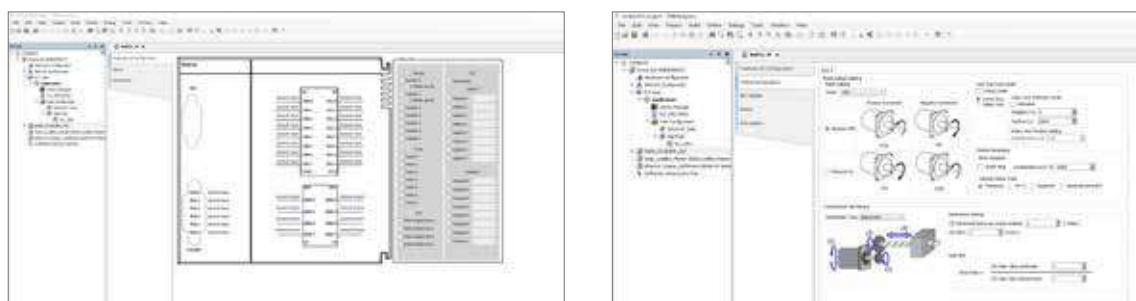

## ▪ Benefits of CODESYS platform

- IEC61131-3 standards
- High performance and stable operation system
- Enhances project development efficiency with a standardized programming and controller development platform for parameter setting, configuration and PLCOpen editing

## ▪ User-friendly programming software New

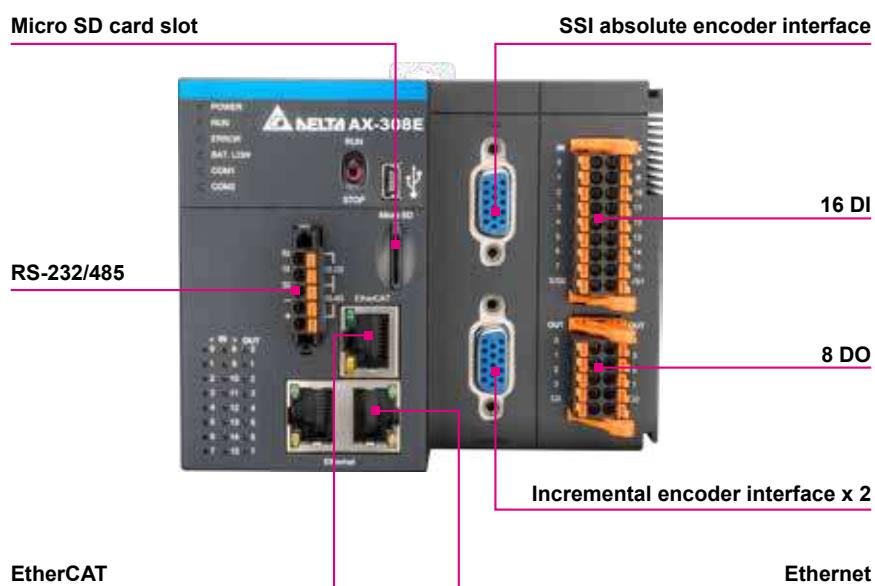

DIADesigner+ is a new programming software for Delta AX series CPUs; it provides an optimized user-friendly programming environment and reduces programming time and effort for users

The user interface of built-in IO and axis parameter configuration

## ▪ Highly integrated CPU design

The AX-3 motion control CPUs feature various built-in I/O and communication protocols to satisfy customer needs for compact design and high performance

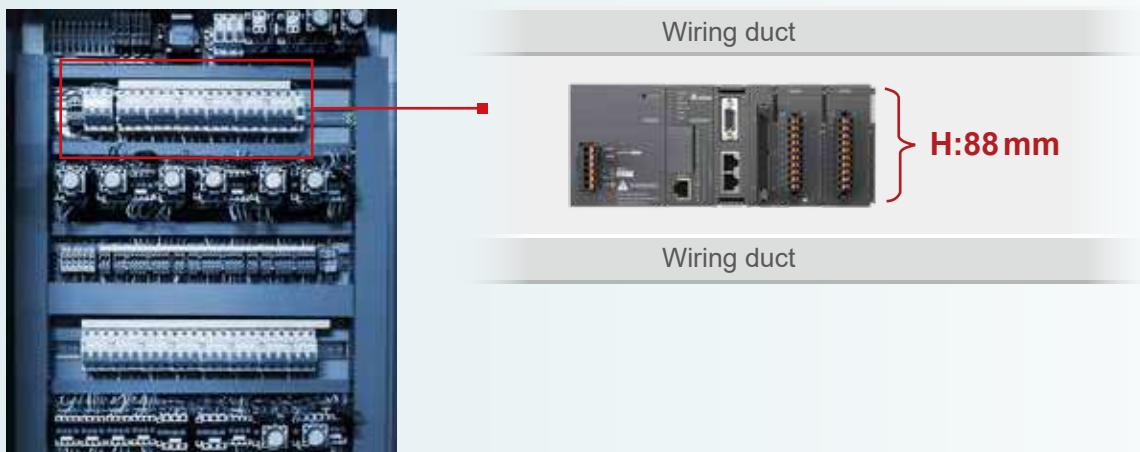

# Simple Installation

## ▪ Easy installation

- Space-saving design, suitable for installation in control panels

## ▪ Rackless DIN-rail installation

➤ Robust slot and clip interlocking design

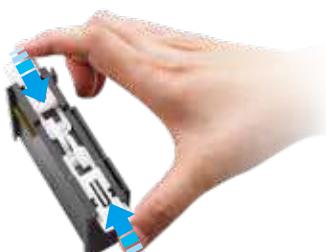

## ▪ Fast disassembly

- Release the clip ring to easily take out the module from the front without moving adjacent modules

## ▪ Simple installation process

- Press the clip rings and push the module to the desired position until you hear a "click" to finish installation

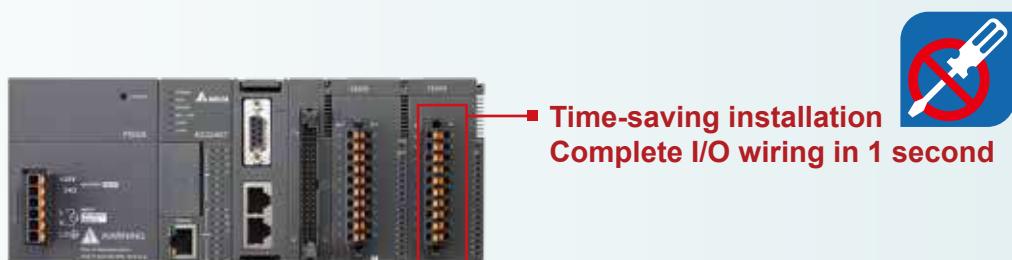

## ▪ Convenient grounding protection

- DIN-rail installation: CPU module and expansion modules can be installed directly on DIN-rail without a backplane
- Installation with screws: pull out the installation clip ring and directly install it on the panel
- Both methods are equipped with ground protection

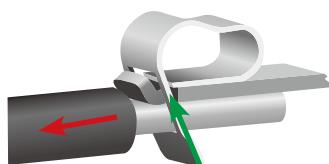

## ▪ Screwless and time-saving installation

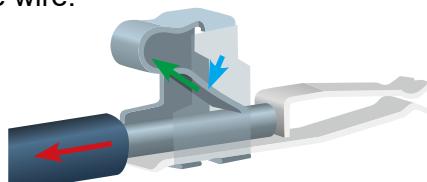

## ▪ Robust loose-proof spring clamp terminal block

- In commonly used spring clamp terminal blocks, the clamping force is determined by the spring material, which decreases with the aging of the spring.

The green arrow is the clamping force, and the red arrow is the pull-out force.

- The AS Series adopts a full-covered spring clamp design that enhances the clamping force. When the wire is pulled-out (red arrow) and the spring moves up (green arrow), a downward force is generated (blue arrow) to clamp the wire.

# Industrial Network Solution

## EtherNet/IP Solution

The open industrial Ethernet communication protocol for real-time control and data collection

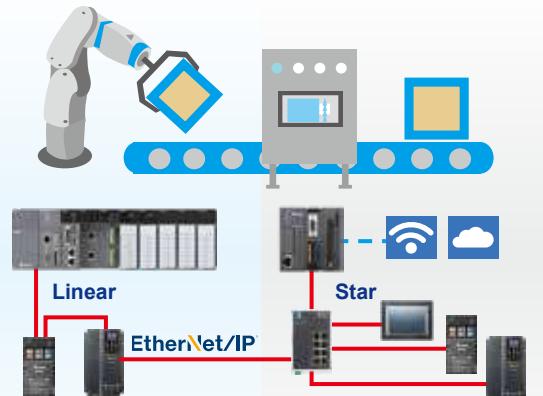

### EtherNet/IP

- Max. connection resource: 32
- Max. data transmission: 500 bytes/connection
- Performance: slave station data update in 1 scan time

### ▪ Flexible network system configuration

- Supports star, linear network topology for fast expansion and management on production lines
- Compatible with IT network, no independent network or IT technician required
- Combines with Delta IES solution to construct IoT for more automation applications and industrial 4.0 upgrades

### ▪ One cable, one network

- Complete Delta EtherNet/IP solution connects different equipment via Ethernet cable to simplify system networking
- Replaces traditional 3-layer industrial network structure with seamless connection via 100 MB high-speed network
- Complete industrial network diagnosis to shorten debug time

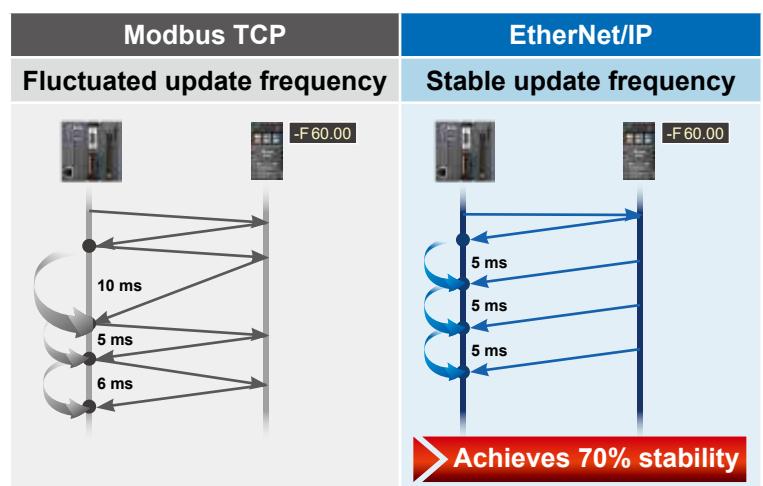

## ■ Software integration

- Consistent data exchange interface shortens learning time with fast system configuration
- Provides Delta's equipment parameter list for quick parameter matching without looking into a detailed manual
- EDS File provides quick connection with EtherNet/IP products of other brands

## ■ Accurate data update

- Provides real-time cyclic and acyclic data transmission and defines data priority between equipment
- Establishes multiple CIP links and defines different register priorities with one piece of equipment
- Executes data update based on user RPI. Updates all slave station data in one scan time
- Enhances stability by 70% compared to traditional Modbus TCP

# Ethernet/IP Software: EIP Builder

The screenshot shows the EIP Builder software interface with several windows open:

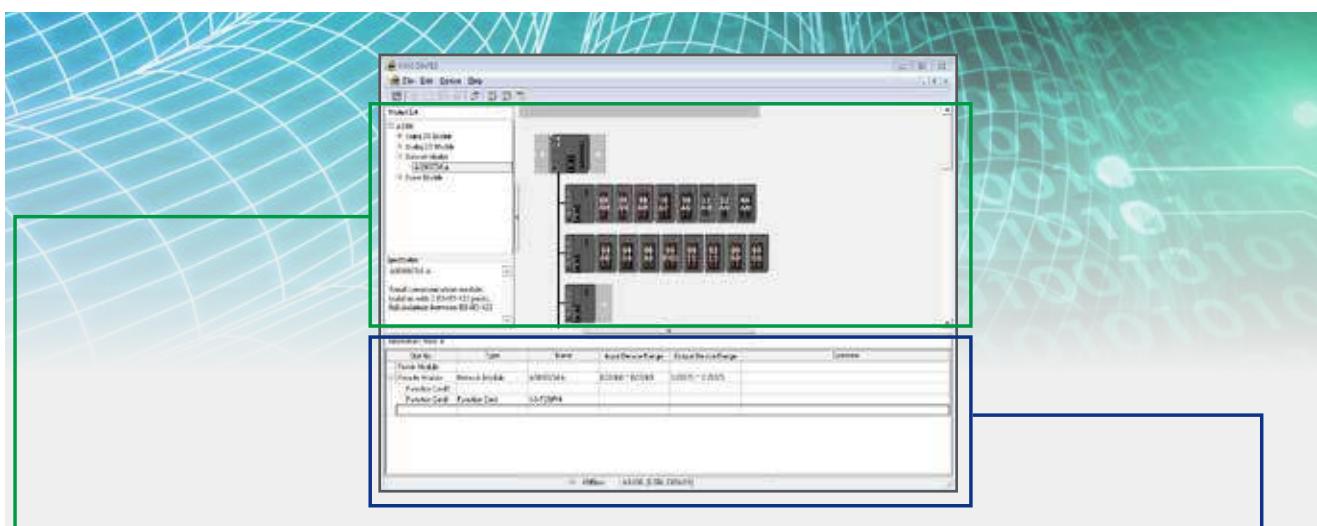

- Network Mapping**: Shows a visualized network mapping of EtherNet/IP devices.
- Parameter List**: Shows a table of parameters for Delta's products.
- Data Exchange Table**: Shows a table for data exchange via table blanks filling.
- Data Input/Output Corresponding Table**: Shows a table for preset data exchange on corresponding parameters.
- Data Exchange Diagnosis**: Shows a table for data exchange status and error codes.
- Visualized Product List**: Shows a list of visualized equipment selection.
- IP Management Function**: Shows a window for managing IP addresses.
- Equipment Description Management Function**: Shows a window for managing equipment descriptions.

# AS200 / 300 Remote I/O Solution

## CANopen Remote I/O

- Max quantity of RIO stations: 15 stations
- Max quantity of IO modules (CPU right side + RIO (SCM) right side): 32 modules
  - Max DIO points: 1,024 points
  - Max quantity of AIO modules: 16 modules
  - Max quantity of communication modules: 4 modules (Only installed on CPU right side)
  - Max quantity of IO modules installed on RIO (SCM) right side: 8 modules
- AS-FCOPM can only be installed in slot 2 of the CPU and SCM
  - When a CPU is installed as AS-FCOPM in slot 2, then slot 1 can be used to install another function card except AS-FCOPM
  - When SCM is working in RIO (RTU) mode, then slot 1 is disabled

\* Note: The AS300 CPU requires this function card for CANopen remote I/O communication

### Hardware Configuration

- Hardware parameter complete planning

### I/O without Planning

- Auto-mapping with I/O addresses in CPU (X, Y, and D)

 **DELTA**

# Serial Communication Solution

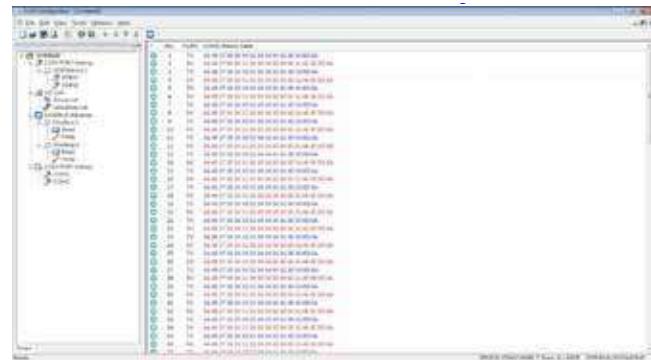

## ■ Modbus Mode

- Easy data exchange configuration

## ■ Real-time history log diagnosis

- AS00SCM stores 2k bytes history log; SCMSoft directly displays the log for real-time communication status monitoring with no additional monitoring software required

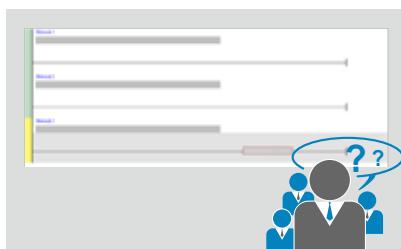

## ■ UD Link Mode (User-defined)

- Easy connection to end equipment via special communication protocols

### Traditional programming structure

Instruction receiving, accessing, editing, transmitting, sequence control

### Connection to end equipment via special communication protocols

- Edits the transmitting/receiving packets via SCMSoft; format exchange and checksum calculation via AS00SCM
- Packet content auto-combination for logic control in PLC, reducing PLC program complexity
- Max. 1,000 transmitting/receiving packets

*	Packet No.	RX Packet Name
1	1	RX Packet1
2	2	RX Packet2
3	3	RX Packet3
		RX Packet14
*	Packet No.	TX Packet Name
1	1	TX Packet1
2	2	TX Packet2
3	3	TX Packet3

No.	Class	Format	Segment View
1	Message Constant	ASCII	"abcd"
2	Address Variable	Null	(R/D Register [4], 4)
3	Message Constant	ASCII	"efgh"

Command execution sequence planning

User-defined communication format editing

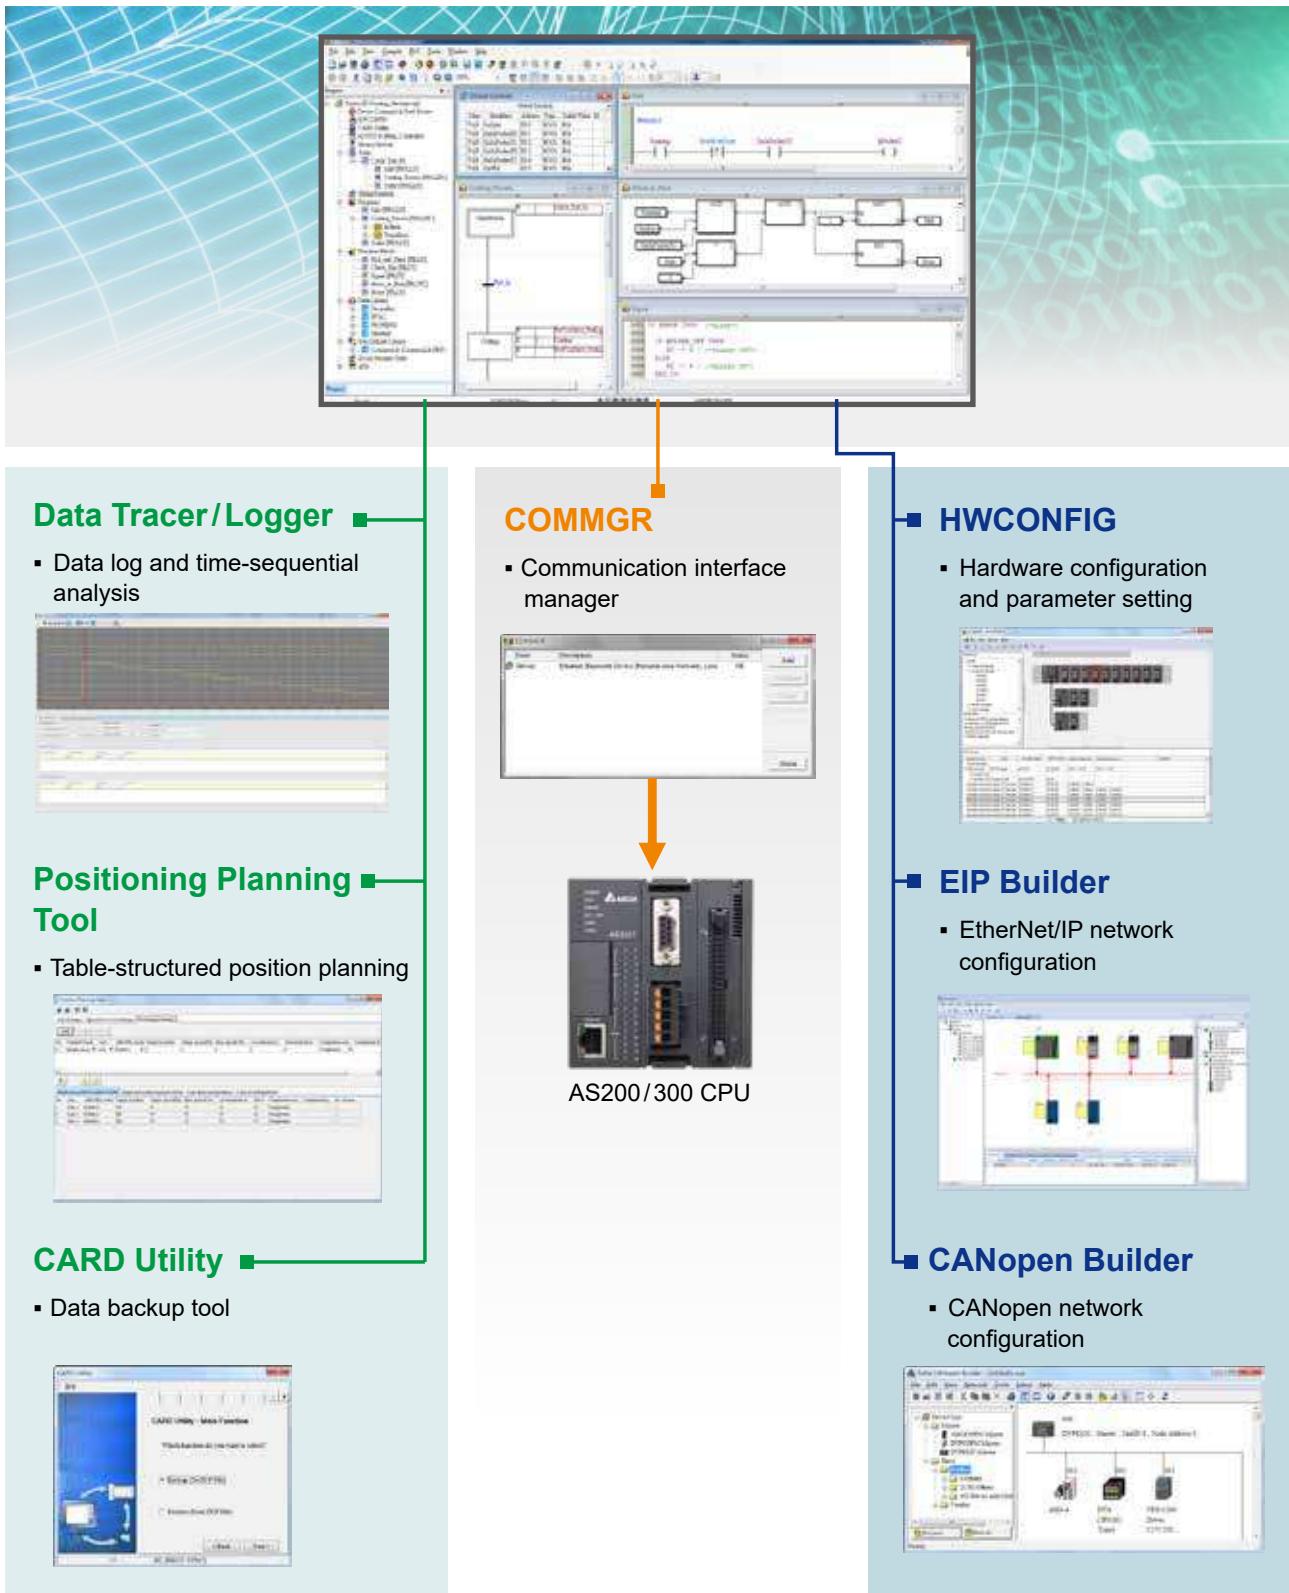

*	Command No.	Command Type	Send Packet	Recv Packet	Success	Fail	Retry	Repeat	Send Wait
1	1	Send & Receive	TX Packet1	RX Packet1	Goto : 1	Goto : 1	0	2	0
2	2	Send & Receive	TX Packet2	RX Packet2	Goto : 2	Goto : 1	0	3	0
3	3	Send & Receive	TX Packet21	RX Packet3	Goto : 3	Goto : 1	0	4	0
4	4	Send & Receive	TX Packet25	RX Packet4	Goto : 4	Goto : 1	0	5	0
5	5	Send & Receive	TX Packet28	RX Packet5	Goto : 5	Goto : 1	0	6	0

# Programming & Diagnosis

## ISPSoft IEC Programming Software

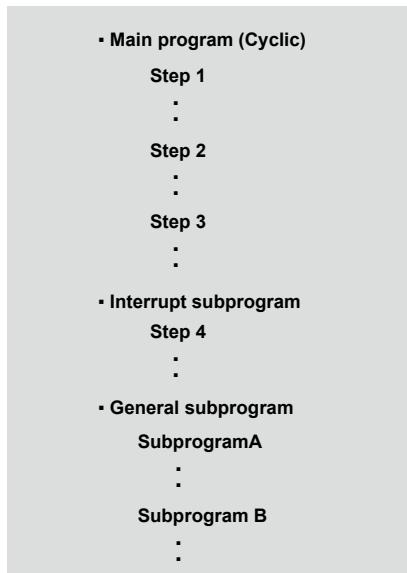

Easy operation greatly enhances efficiency

# Modular Program Structure

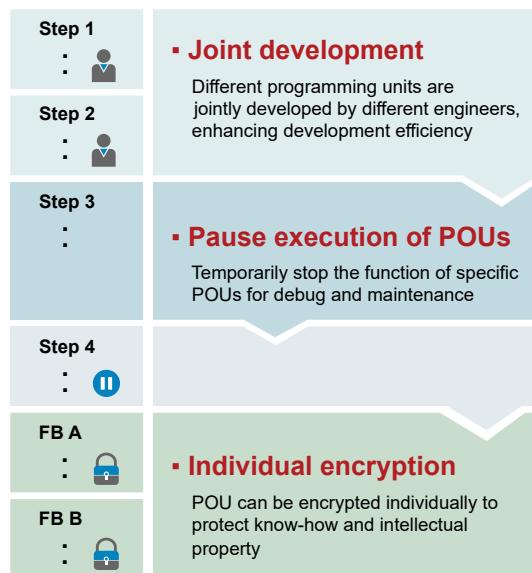

## ■ Traditional program structure

Errors are often found in large-scale programs under a traditional structure and are hard to debug while increasing maintenance cost

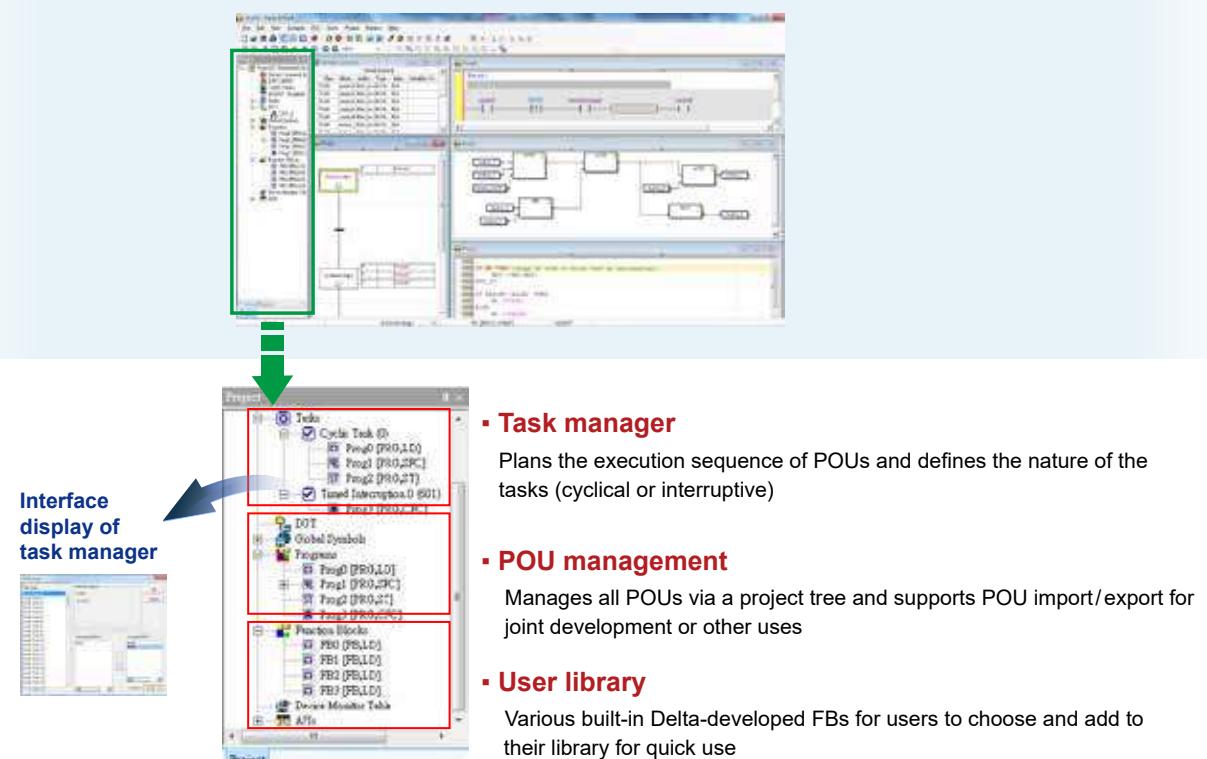

## ■ Modular program structure

Programming organization unit (POU) enables easy management in large-scale programs with high development efficiency

## ■ Modular Program Structure

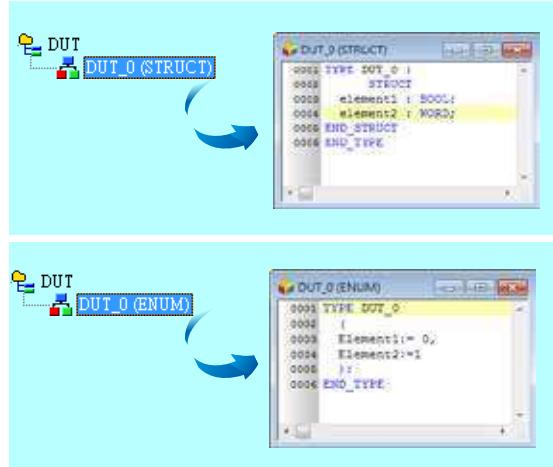

Note: Actual support functions will vary by series

# Convenient Programming

## ▪ User-defined data type

In addition to basic data types, users can define structures and enumerations for flexible programming

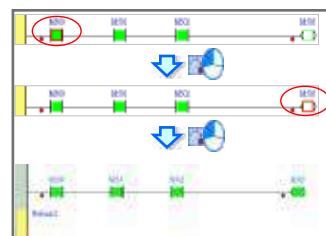

## ▪ On-line programming/update

Supports program editing in monitoring mode and program updates during equipment operation for convenient debugging and maintenance

## ▪ Debugging mode

Supports breakpoints, single step execution and other functions to enhance debugging efficiency

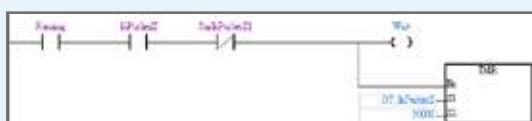

# Multiple Programming Languages

## ▪ Supports multiple programming languages in the same project

### ▪ Ladder Diagram (LD)

ISPSof provides a programming interface with the widely used LD language for faster programming

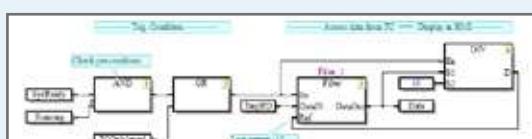

### ▪ Structured Text (ST), C Language

Similar programming method to advanced programming language. It provides more convenient editing for complicated expression

```
0001 #include <std.h>
0002 IF (Value1 > Value2) THEN
0003   Value3 := Value1 + 1;
0004 ELSE
0005   Value3 := Value2 + 1;
0006 ENDIF
0007 WHILE (Value3 < Value4) DO
0008   Value3 := Value3 + 1;
0009 ENDWHILE
```

### ▪ Continuous Function Chart (CFC)

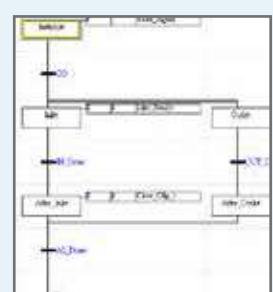

CFC provides more advanced applications than FBD; it supports data feedback, direct display of data stream and execution sequence for motion control and sequence-centered application

Note: ISPSof V3.01 supports CFC language

### ▪ Sequential Function Chart (SFC)

Direct and easy expression for the steps in flow charts, suitable for applications that require process control

Note: Actual support functions will vary by series

# Easy Hardware Configuration and Parameter Setting

## HWCONFIG

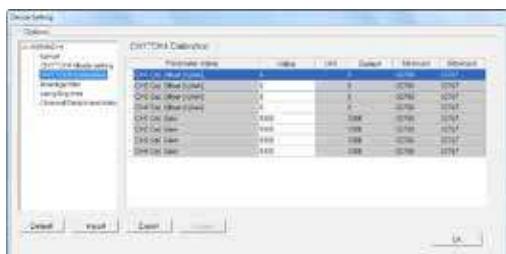

- **Graphic panel for module configuration**

Quick setup with automatic configuration imported by barcode scanning

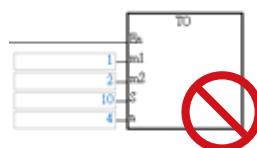

- **I/O listing**

Direct display for corresponding device addresses after configuration

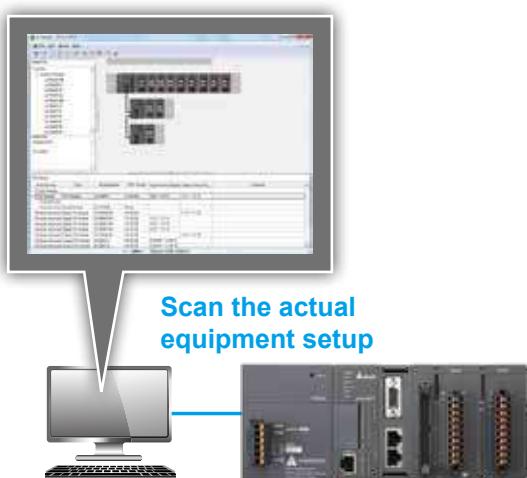

- **Parameter setting**

Fast parameter setting on controller and modules without manual reference or programming

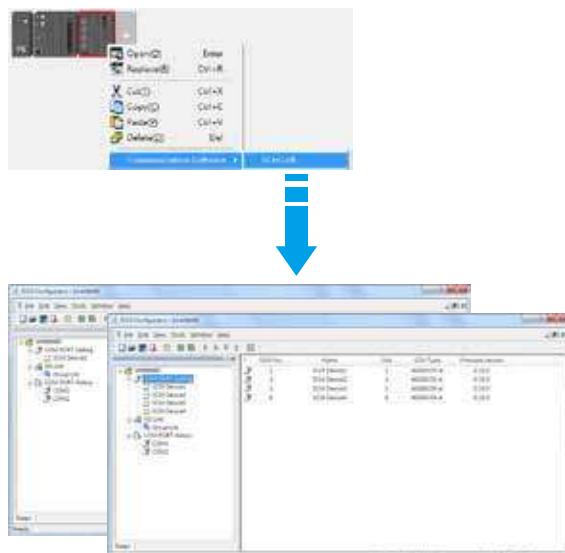

Note: Fill the table to configure module parameters quickly.  
From/To instruction is not required for module initialization.

- **Module configuration method**

- **Smart module configuration**

Supports an advanced planning tool for a variety of network modules

Note: Actual support functions will vary by series

# Complete Diagnosis Tools for Quick and Effective System Monitoring

## Data Logger/Tracer

### ▪ Real-time monitoring:

High-speed tracer for fast sampling within 1 scanning cycle

### ▪ Stable logging:

Long-time data logger savings of up to 32,768 data records, which can be transferred to SD card

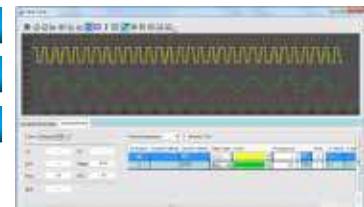

### ▪ Precise data acquisition:

Supports a variety of sampling intervals and trigger modes

### ▪ Convenient comparison:

Multiple data logs in various data formats can be recorded at the same time for comparison

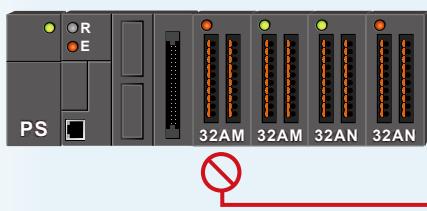

- Real-time
- Stable
- Precise

### ▪ Efficient data analysis:

Supports trend display, scaling, arrangement, merge and measurement

## Real-time Module Monitoring

### ▪ Visualized monitoring

Direct monitoring interface provides real-time status on modules via LED indicators

### ▪ Module comparison

Real-time inspection of actual module settings to ensure consistency

### ▪ Error logs

Immediate inquiry for error messages and logs of anomalies

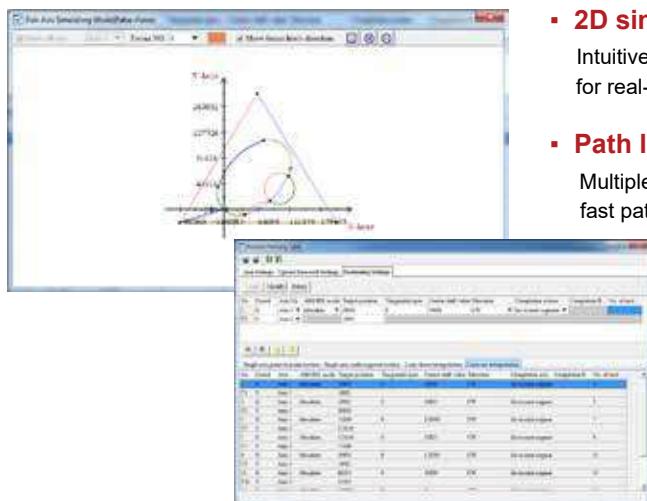

### ▪ Module information

Provides model name and version of current modules

Note: Actual support functions will vary by series

# Convenient Software Wizards for Effortless Planning (AS200 / 300 series only)

## Positioning planning table

### ▪ 2D simulation

Intuitive 2D track simulation without complicated calculation for real-time path planning

### ▪ Path list

Multiple combinations for positioning modes and tracks; fast path planning via table-structured planning

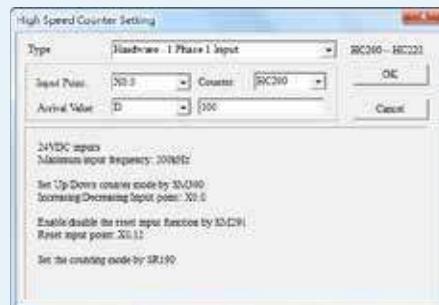

### ▪ Axis parameter setting

Intuitive configuration interface for easy axis parameter setting without manual reference

## ■ High-speed counter setting tool

- Counter index will display corresponding contact point, device and counter specification under counting mode
- Fast planning without manual reference for enhanced development efficiency

### ➤ One-time setting

## ■ Data backup tool - CARD Utility

Friendly guidance interface for easy data backup and restore on programs, parameters and devices

Various backup and restore methods for flexible management and operation

Data backup to PC

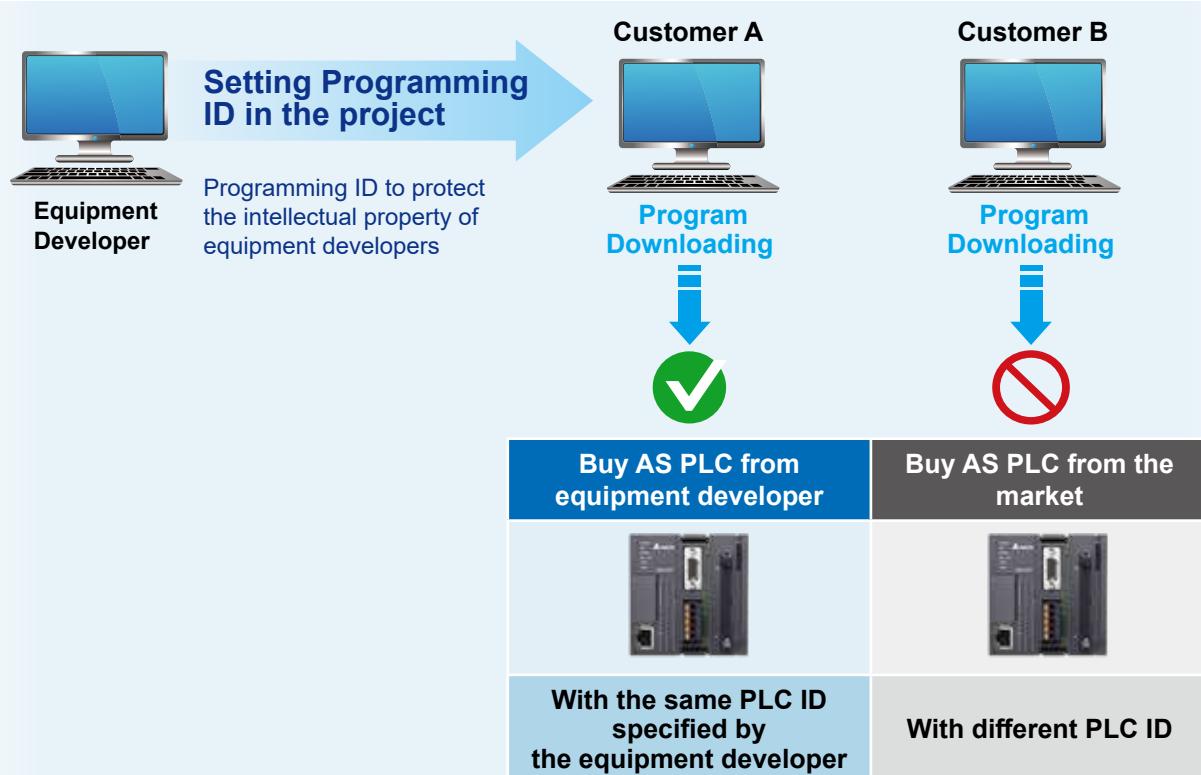

32GB Data backup to SD card

Note: Actual support functions will vary by series

# Multiple Security Protection for Programs and Data

## ▪ Security: provides 6 types of program protection for data safety

- 16-digit password protection on main program
- 16-digit password protection on FBs
- Access denial mechanism on error login
- Data upload protection function
- Verification between Project (Programming ID) and CPU (PLC ID)

- Prevents direct copy from IC (AS200/300 series only)

Note: Actual support functions will vary by series

## CPUs

### AS200 CPUs

AS200 Series CPU Standard Specifications			
Program capacity 64k steps	Basic instruction 25 ns	Real I/O capability: 1,024 pts   Expansion modules: 32	
USB/RS-485 x 2/ EtherNet/CANopen	Micro SD Card	EtherNet/IP, Modbus CANopen remote I/O	CANopen DS301 Position Control
Model	Built-in I/O	High-speed Output	High-speed Input
AS228T-A/AS228P-A/ AS228R-A	16 DI/12 DO	6 axes 200 kHz pulse output	4 channels 200 kHz high-speed counters
AS218TX-A/AS218PX-A/ AS218RX-A	8 DI/6 DO 2 AI/2 AO	3 axes 200 kHz pulse output	4 channels 200 kHz high-speed counters

### AX-3 CPU

AX-3 Series CPU Standard Specifications			
Program capacity 8 MB	Basic instruction 5 ns	Expansion modules: 32	
USB/RS-232/485/ Ethernet (1G)	Micro SD Card	EtherNet/IP, Modbus	CODESYS solution
Model	Built-in I/O	Encoder	High-speed Input / Output
AX-308EA0MA1T AX-364ELA0MA1T	16 DI/8 DO	Incremental encoder: 2 CHs SSI absolute encoder: 1 CH	200 kHz pulse output: 4 axes 200 kHz high-speed counters: 6 CHs
AX-304ELA0MA1T AX-324NA0PA1P	16 DI/8 DO	-	200 kHz pulse output: 4 PWM channels 200 kHz high-speed counters: 6 CHs
AX-300NA0PA1	-	-	-

## Power Supply Modules

Power Supply Modules Specifications			
<b>AS-PS02</b> 	Input 100 V <sub>AC</sub> ~ 240 V <sub>AC</sub>	<b>AS-PS02A</b> 	Input 100 V <sub>AC</sub> ~ 240 V <sub>AC</sub>
	24 V <sub>DC</sub> , 2A (for internal bus)		24 V <sub>DC</sub> , 1.5A (for internal bus) 24 V <sub>DC</sub> , 0.5A (for external I/O)
<b>AS-PS03C</b> 	Input 100 V <sub>AC</sub> ~ 240 V <sub>AC</sub>		
	24 V <sub>DC</sub> , 3A (for external I/O)		
	RS-485 (Modbus)		
	Provides information of power status/abnormal alarm/life prediction

	458.3 mA
<b>AX-324N</b>	458.3 mA
	Extension Modules Digital relay output < 150 mA, other modules < 80 mA
Operating Temperature	-20~60°C (AX Series CPU: -20~55°C)
Storage Temperature	-40~80°C
Operating Humidity	5~95%, non-condensing
Storage Humidity	5~95%, non-condensing
Vibration	IEC 61131-2, IEC 60068-2-6 (TEST Fc); 5Hz ≤ f ≤ 8.4 Hz, constant amplitude 3.5 mm; 8.4 Hz ≤ f ≤ 150 Hz, constant acceleration 1g
Shock	IEC 61131-2, IEC 60068-2-27 (TEST Ea); 15g peak, 11 ms duration, half-sine
Operating Environment	Non-corrosive gas
Installation	Inside of the control panel
Pollution Degree	2
Protection Rating	IP20
Conformal Coating	Yes

# Ethernet Specifications

Item		AS300 Series		AS200 Series	Note
<b>Protocols</b>		Modbus TCP, EtherNet/IP, SMTP, HTTP			Supports all protocols at the same time
<b>Modbus TCP</b>	Connection (Server)	32	16		
	Connection (Client)	32	16		
	RTU-EN01 Connection	4	4		
<b>Socket</b>	TCP Connection	4	2		
	UDP Connection	4	2		
<b>SMTP</b>	E-mail Connection	4	2		
<b>EtherNet/IP</b>	Operation Mode		Scanner/Adapter		
	CIP_IO Connection	CIP Connection	32 (Client + Server)	16 (Client + Server)	Shared with IO connection
		TCP Connection	16 (Client + Server)	8 (Client + Server)	Shared with IO connection
		Requested Packet Interval (RPI)	5 ms ~ 1,000 ms		Default: 20 ms
		Max. Performance	3,000 pps		
		Max. Capacity per Connection	500 bytes		
	CIP_Explicit Message	Class 3 (Connected Type)	32 (Servers), shared with UCMM	16 (Servers), shared with UCMM	Shared with IO connection
		UCMM (Non-Connected Type)	32 (Clients + Servers), shared with Class 3	16 (Clients + Servers), shared with Class 3	Shared with IO connection
		Supported CIP Objects	Identity, Message Router, Assembly, Connection Manager, Port, TCP/IP interface, Ethernet link, Vendor specific		
	CIP_Produced TAG	Max. CIP Connections	32 (Servers)	16 (Servers)	Shared with IO connection
		Max. Capacity	400 bytes		
		Requested Packet Interval (RPI)	5 ms ~ 1000ms		
	CIP_Consumed TAG	Max. CIP Connections	32 (Clients + Servers)	16 (Clients + Servers)	Shared with IO connection
		Max. Capacity	400 bytes		
		Requested Packet Interval (RPI)	5 ms ~ 1000 ms		
AS00SCM (RTU) + AS-FEN02 Connection Nodes		15	8	AS RTU Mode

# I/O Modules

## ■ Digital Input Modules

				Rated input voltage 5~24 V <sub>DC</sub>
<b>8 inputs</b> Easy wiring terminal block AS08AM10N-A	<b>16 inputs</b> Easy wiring terminal block AS16AM10N-A	<b>32 inputs</b> High-density MIL terminal block AS32AM10N-A	<b>64 inputs</b> High-density MIL terminal block AS64AM10N-A	Response time 1 ms
				Filter function 1~20 ms
				Screwless removable terminal block 8 / 16 inputs

## ■ Digital Output Modules

				NPN (Sink) or PNP (Source) module
<b>8 outputs</b> Easy wiring terminal block Transistor output NPN (Sink) AS08AN01T-A	<b>8 outputs</b> Easy wiring terminal block Relay output AS08AN01R-A	<b>8 outputs</b> Easy wiring terminal block Transistor output PNP (Source) AS08AN01P-A	<b>32 outputs</b> High-density MIL terminal block Transistor output NPN (Sink) AS32AN02T-A	Response time 1 ms (Transistor) 10 ms (Relay)
				Screwless removable terminal block 8 / 16 outputs

			
<b>16 outputs</b> Easy wiring terminal block Transistor output NPN (Sink) AS16AN01T-A	<b>16 outputs</b> Easy wiring terminal block Relay output AS16AN01R-A	<b>16 outputs</b> Easy wiring terminal block Transistor output PNP (Source) AS16AN01P-A	<b>64 outputs</b> High-density MIL terminal block Transistor output NPN (Sink) AS64AN02T-A

## ■ Digital I/O Modules

			NPN (Sink) or PNP (Source) module
<b>16 inputs / outputs</b>  Easy wiring terminal block 8 inputs/8 transistor outputs NPN (Sink)  AS16AP11T-A	<b>16 inputs / outputs</b>  Easy wiring terminal block 8 inputs 8 relay outputs  AS16AP11R-A	<b>16 inputs / outputs</b>  Easy wiring terminal block 8 inputs/8 transistor outputs PNP (Source)  AS16AP11P-A	Rated input voltage 5~24 V <sub>DC</sub> Filter function 1~20 ms
Screwless removable terminal block			Response time 1 ms (Transistor) 10 ms (Relay)

## ■ Analog I/O Modules

				
<b>4 channels</b>  Analog input  AS04AD-A	<b>8 channels</b>  Analog input  AS08AD-B	<b>8 channels</b>  Analog input  AS08AD-C	<b>4 channels</b>  Analog output  AS04DA-A	<b>6 channels</b>  Analog input/output  AS06XA-A
Conversion time 2ms/channel	50/60 Hz filter	A: Voltage and current B: Voltage C: Current	Resolution AI: 16-bit AO: 12-bit	
Accuracy ±0.2%	4/6/8 CHs	Module monitoring/configuration	Differential inputs	

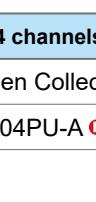

## ■ Load Cell Module

	<b>Functions</b>	
	50/60Hz filter	High-speed dynamic measurement
	2 channels of independent sampling	Accuracy 0.04% of full-scale
	2 CHs	Connectable to 4-wire/6-wire load cell sensor
<b>2 channels</b>  AS02LC-A	<b>Software</b>	
	Filter function	Multi-point calibration
	Online monitoring/configuration	

## ■ Pulse Unit Modules

<b>2 channels</b>	<b>2 channels</b>	<b>4 channels</b>
	Differential  AS02PU-A <b>New</b>	Open Collector  AS04PU-A <b>New</b>

## ■ High Speed Counter Module

	Input: AS02PU: 200kHz		200 kHz
	Output: AS02PU: 200kHz AS04PU: 100kHz		Incremental / Absolute (SSI)
	Open Collector/Diff.	<b>2 channels</b>	Open Collector/Diff.
	2/4 CHs		AS02HC-A <b>New</b>
	Support Motion APIs		Compare / Capture

# I/O Modules

## ■ Temperature Measurement Modules

	
<b>4 channels</b>	<b>6 channels</b>
PT, NI temperature sensor	PT, NI temperature sensor
AS04RTD-A	AS06RTD-A

Conversion time 200ms/channel	Resolution 0.1°C/0.1°F	Wire breaking detection
Overall accuracy ±0.1%	50/60Hz filter	Module monitoring/configuration
Pt100/Ni100/Pt1000/Ni1000/JPt100/LG-Ni1000/Cu50/Cu100, resistor 0~300Ω, 0~3,000Ω		

	
<b>4 channels</b>	<b>8 channels</b>
TC temperature sensor	TC temperature sensor
AS04TC-A	AS08TC-A

Conversion time 200ms/channel	Resolution 0.1°C/0.1°F	Disconnection detection
Overall accuracy ±0.5%	50/60Hz filter	Module monitoring/configuration
J, K, R, S, T, E, N, B type thermocouple; ±100mV		

## ■ Communication Modules

	<b>COM port</b>	RS-232C	RS-422	RS-485	CANopen	Ethernet	PROFINET
<b>2 COM ports</b>	<b>Function</b>	Supports standard Modbus protocols and user-defined protocols			Slave mode and RTU mode	EtherNet/IP RTU mode	PROFINET RTU mode
AS00SCM-A	<b>Software</b>	SCMSoft			CANopen Builder	EIP Builder	-

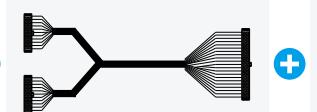

Note: The above functions need optional function cards

	
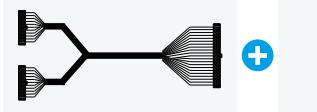

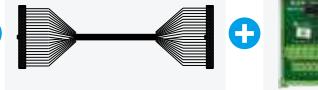

<b>DeviceNet</b>	<b>IO-Link</b>
AS01DNET-A	AS04SIL-A <b>New</b>

<b>COM port</b>	DeviceNet	IO-Link (4-CH)
<b>Function</b>	Master/Slave/RTU	Master
<b>Software</b>	DeviceNet Builder	HWCONFIG
